Walform

06/2026 – NOW

[View project](#)

WalForm is a decentralized form builder that lives end-to-end on Sui + Walrus + Seal. Every form schema is a Sui object, every submission is a Seal-encrypted Walrus blob, every site can be deployed to its own Walrus Sites with a SuiNS name. Creators get a polished drag-and-drop builder; respondents get one-click submit with sponsored gas; no platform — including us — can read submissions or take a form down.
