WORK EXPERIENCE

Freelance Fullstack Developer
06/2026 - Present | Remote

- Built and maintain richcn, a Notion-style block editor for React and shadcn/ui on Plate, with a slash menu, tables, media blocks, mentions, and an autosave persistence adapter.
- Published 8 components and 3 blocks as a shadcn registry, each installable with one `npx shadcn add` command.

Fullstack Developer - Formo
09/2025 - 05/2026 | Ho Chi Minh City, Vietnam

- Owned the design and delivery of Workspace API Keys, covering database schema, scoped permissions, backend APIs, and the management UI.
- Built an authenticated CLI spanning six product domains: analytics, profiles, dashboards, alerts, contracts, and segments.
- Shipped an MCP server, MVP client, and documentation for exposing project-scoped analytics to external AI clients.
- Integrated automation, monitoring, authentication, and analytics infrastructure with Trigger.dev, Checkly, Supabase, and Tinybird.

Frontend Developer Intern - FPT Software
09/2024 - 05/2025 | Ho Chi Minh City, Vietnam

- Implemented the frontend for FAMS, a student management application delivered by a 10-person project team.
- Created the shared UI foundation and reusable templates with Next.js and React.
- Implemented client state with Redux Toolkit and integrated APIs with the backend team.

SELECTED PROJECTS

richcn OPEN SOURCE · LIVE richcn.huanngdev.site github.com/huanngdev/me

Notion-style block editor for React and shadcn/ui, installed into any app with the shadcn CLI and documented with live demos.

Contribution: Designed and built the editor, docs site, registry, and an AI agent skill; the editor ships as a block on huanngdev.site.

Tech stack React · TypeScript · Next.js · Plate · shadcn/ui · Tailwind CSS

WalForm TOP 1 · LIVE walform.wal.app github.com/UyLeQuoc/sui-walform

Shipped a decentralized form builder with customizable forms, client-side encryption, and AI-assisted generation in four weeks.

Contribution: Owned all frontend engineering in a two-person team. Won Top 1 and continued to support later Walrus sessions.

Tech stack React · TypeScript · Sui · Move · Walrus · Seal

MarkQ OPEN SOURCE github.com/huanngdev/markq

Built a Markdown-first quiz engine with server-authoritative grading, answer review, analytics, and persistent attempt history.

Contribution: Designed the quiz format and full-stack application, including validation, autosave, immutable review snapshots, tests, and CI.
